

Fix-O-Mat Basic

"Tray filling & inspection machine"

The Visser Fix-O-Mat Basic tray inspection and filling machine is designed to replug or fix plug trays to 100% viable young plants. The Fix-O-Mat Basic plug fixer removes and replaces plugs simultaneously with two independent working grippers.

Two digital high resolution cameras are used to determine the position of the plants that need to be removed and the plants that are used to fill up the empty cells. The well-known Visser grippers guarantee a perfect planting result without damaging. The This Fix-O-Mat Basic plug fixer is engineered to be used as a stand alone machine or to be used in combination with a blow out machine for higher capacity.

Why choose the Fix-O-Mat Basic?

- ✓ Easy to operate
- ✓ Compact
- ✓ No plant damage

“

Capacity up to 3.000 plants per hour

”

Fix-O-Mat Basic

"Tray filling & inspection machine"

Features

- Capacities up to 3.000 plants per hour, depending on tray size and germination rate.
- Gripper head with 2 grippers, that can be used for most plug/Seed trays.
- 2 digital high resolution cameras to scan both tray conveyors.
- User friendly control panel to operate the machine.
- Easy to adjust grading software.
- Because of the unique design of the Visser gripper no push up system is needed.
- Up to 100 programs to be stored in the memory.

Technical specifications

Dimensions L x W x H	L x W x H = 4.800 x 1.700 x 1.850mm
Motor rating	2,4 kVA
Electrical requirements	400 Volt 3 phase 50 Hz + 0 + earth, in adequate power and if necessary filtered and stabilised, Other voltages on request.
Air consumption	250 litre per minute
Capacity	Up to 3.000 plant per hour. A definite capacity can be given when all te parameters are known. Such as: plug size, plant height, travel height of the gripper, plant species, root development and germination rate.
