## Pot Filler Mayer TM 2400E

"High performance potting machine"

Even those who are already convinced of the economy, productivity and versatility of the Mayer potting machines will truly rave over the Pot Filler Mayer TM 2400: the wide range of pot sizes that can be used makes the TM 2400 a very flexible, multipurpose machine for which peak performances of up to 4,000 respectively 7,000 pots per hour are perfectly normal.

Again with the new potting machine TM 2400 innovative technology is combined with ergonomic handling. The electronic frequency controls for the turntable and elevator ensure precise output control and are easy to operate via the control panel within the working area. Additional frequency converters for soil conveyor, drill motor and conveyor belt are available with surcharge.

quality.

The outstanding quality of the machine guarantees top planting quality: With a constant central precision plant hole drill, the TM 2400 creates the perfect basis for consistently favourable cultivation conditions as well as consistent plant

A very flexible, multipurpose potting machine

”

### Why choose the TM 2400?

- ✓ Up to 7,000 pots/hour
- ✓ Extremely flexible
- ✓ Easy changeover to different pot sizes
- ✓ Perfect combination with Visser transplanter

### Perfect match with Visser transplanter

The Pot Filler Mayer TM 2400E perfectly matches the Visser PC-11 transplanter: potting and planting with high accuracy up to 7,000 plants/hour.

PC-11 transplanter

"High performance potting machine"

## Features

- The original Mayer circular system for maximum ergonomics at work.
- Maximum smooth-running and precision, even at top production speeds.
- Perfectly central planting holes for optimum planting quality.
- Can be used for all pot sizes with diameters between 8 and 24/26 cm.
- Productivity can nearly be doubled by means of a simple changeover (Pot support ring/double drilling system/2nd magazine).
- Pot sizes and heights can be adjusted fast and centrally by means of a ratch (standard).
- Electronic precision control of machine output by means of a frequency converter (easy to operate).
- Clockwise rotating model available (with surcharge).
- Can be used with standard or special drills.
- Flexible arrangement of conveyor belt at 8 positions around the turntable.
- Compatible with all popular automation and further transplanting systems.
- Large variety of different configurations with accessories.
- Intelligently constructed soil hopper prevents tunnel or bridge formation in the soil supply (protected by patents).
- Substrate conveyed without harm to its structure.
- High safety standard (e.g. 2 emergency OFF switches).

## Technical specifications

Pot size	
<i>single pot holders</i>	8-24/26 cm Ø (depending on type of pot)
<i>double pot holders</i>	8-13 cm Ø
Output	up to 4,000 (TM2400E) respectively 7,000 pots/h (TM2400DR)
Output (with Visser PC-11 transplanter)	up to 4,000 (PC-11/2) respectively up to 7,000 plants/h (PC-11/4)
Soil hopper	1,500 litres
Soil hopper (extended)	1,500 litres
Transport dimensions (LxWxH)	4,10 x 1,90 x 1,95 m
Weight	1500 kg
Accessoires	Additional module for fast changeover to double pot holders (Double drilling system, 2nd magazine, pot support ring), fertiliser doser, belt storage magazine, soil hopper chute, trailer coupling, stainless steel shovels, special tyres, addition for orchids, drill motor reinforcement, additional frequency converters, etc. Extensive assortment of accessories and solutions for special purposes.
